

# HIGH SPEED BROADBAND

Do you envision showing your business to the world? Need fast access to the Internet? Acorn Technology offers the most affordable and reliable connectivity to the Internet. From fixed-wireless to fiber-optics, Acorn Technology can help propel your business into the global marketplace. Broadband connection allows you to send and receive e-mails instantly, access web pages immediately, and transfer large files at the same speeds you conduct your business. Having access to the unlimited resources available on the Internet faster than ever allows your business to increase efficiency and productivity, giving you the edge over your competitors. Don't be left behind, let us take you into the future of business today.

## Broadband services provided by Acorn Technology

### Fixed Wireless

- » Fast installation so that you are online within days, not weeks
- » 10-50 times faster than dial-up
- » Upload and download information at the same speed, fast
- » Reasonable prices starting as low as \$149 per month
- » Fixed wireless offers instant access to the Internet in areas that DSL and Cable cannot

### Terrestrial (T1)

- » Dedicated, stable and reliable speeds of 1.5 Mbps over existing lines to your building
- » Bidirectional speed which allows you to have constant 1.5 Mbps down and up
- » Incredible savings with prices starting as low as \$499 per month
- » Partial T1 connections are also available

### DS3

- » Speeds up to 45 Mbps
- » Offers the same dedicated, stable and reliable service as a T1
- » Prices are customized according to your requirements and needs

### Fiber-Optic (OC3, OC12, or faster)

- » Send and receive information at the speed of light
