

MANAGED IT SERVICES

Why outsource your IT needs

Outsourcing enables companies to leverage the economies of scale, skill, and scope of specialists required to develop a core competency. With Acorn Technology's sophisticated integrated technology and tailored add-ons, you may easily reach the most desired IT results with the least time and money. Once you have Acorn Technology handling your IT needs, you are free from dealing with training, up-to-date IT standards and lead time for additional infrastructure outlays.

What can be expected from Acorn Technology

- » A wide variety of complete IT solutions that ensure the consistency and compatibility of your network system
- » Each client works with our professional tech staff for a customized IT plan based on your specific needs
- » Our infrastructure and services are scalable in order to support the growth of your business
- » Reduce the total cost of ownership through reduced expenditures on hardware, software and IT staff
- » Professional tech staff available 24/7
- » Predictable price with a predictable service
- » All IT service costs conveniently consolidated into one bill
